

Grzegorz Gołębiowski

Senior Java Developer, Tech Lead, 6+ YoE

Warsaw, Poland | grzegorz.golebiowski127@gmail.com | linkedin.com/in/grzegorz-golebiowski

Gallup Top 5: Individualization, Learner, Relator, Arranger, Achiever

Summary

Software Engineer with a Master's degree in Computer Science and hands-on experience in Java-based tech stack. Led a team of 10+ members in building software for the banking sector. Experienced in guiding the transformation of a system from monolithic architecture to microservices, addressing challenges related to latency, throughput and scalability. Gained deep, practical knowledge through real-world problem-solving and system optimization. Collaborated closely with clients and across multiple teams to deliver solutions.

Key skills

Areas of expertise: content management systems, custom software development, requirements analysis, project estimation, system design and architecture, backend development, debugging

Programming languages: Java, Clojure, SQL, Python, JavaScript, Typescript

Technologies: Spring, Spring Boot, Jakarta EE, WildFly, JBoss EAP, Hazelcast, PostgreSQL, jOOQ, Flyway, Varnish Cache, Consul, Apache Kafka, Apache Zookeeper, Solr, Quartz, Swagger, React JS, Gatsby SSG

Architecture: Microservices, C4 model, onion architecture, anemic and rich domain models, caching

DevOps: Docker, Kubernetes, k3s, OKD, Openshift, Kustomize, Helm, GitOps, Jenkins, Grafana, Sonatype Nexus Repository

AI: GitHub Copilot CLI, Spec-Driven Development, GitHub's Spec Kit

Tools: Linux, macOS, Jira, Neovim, IntelliJ IDEA, Git, Gradle, SonarQube, OWASP Dependency-Check

Leadership: Blake and Mouton Managerial Grid Model, Blanchard Situational Leadership Model, Start-Stop-Continue feedback

Languages: Polish (native), English (C1)

Experience

Senior Java Developer, Tech Lead, e-point SA

Jan 2023 – Sep 2025

- Led development of a CMS web platform with 15+ deployed services, serving traffic for millions of users for one of the leading banks in Poland
- Delivered features across multiple projects in both time-and-material and fixed-price contracts, working across Waterfall and Agile methodologies
- Redesigned release and deployment processes, reducing error rate and developer's manual effort
- Drove continued decomposition of monolithic architecture into a modular monolith, with a long-term goal of microservices migration
- Coordinated cross-team collaboration and acted as technical point of contact for clients
- Orchestrated PostgreSQL major version upgrade (9.6 to 16.9), including data migration planning and execution
- Led migration of the container platform from OKD3 to OKD4
- Analysed DDoS incidents, investigated logs, implemented traffic protection measures and fixed corresponding bugs

Senior Java Developer, e-point SA

May 2022 – Dec 2022

- Implemented new features and contributed to decomposition of monolithic architecture into more modular components
- Identified and resolved performance bottlenecks in application code
- Participated in architecture design and technology selection

- Maintained and extended deployment pipelines using Jenkins
- Configured and maintained Kubernetes environments in OKD
- Analysed and optimised database queries to improve application throughput
- Designed SSE-based communication with frontend for parallel session handling and session count control
- Planned and executed load and performance tests using Gatling
- Coordinated application releases and production deployments in collaboration with a client

Java Developer, e-point SA

Sep 2020 – Apr 2022

- Remediated security vulnerabilities identified in external audits, such as cache poisoning and XSS issues
- Tuned circuit breaker, rate limiting and retry mechanism parameters
- Contributed to architecture design, technology selection and solution evaluation
- Participated in business requirements analysis and refinement within an Agile team
- Worked with deployment pipelines with Jenkins; configured and maintained Kubernetes environments
- Improved system observability with Grafana dashboards and alerts
- Developed and maintained automated UI test suites using Selenium

Junior Java Developer, e-point SA

Aug 2019 – Aug 2020

- Developed and maintained the e-point CMS platform for the banking and insurance sector
- Implemented new CMS modules and components tailored to client requirements
- Handled bug fixes and performance optimisations in existing codebase
- Worked on integrations with external systems and third-party APIs

Education

Polish-Japanese Academy of Information Technology, MS in Computer Science

Sep 2020 – Jul 2023

- **Specialization:** Mobile device network and cloud computing technologies
- **Thesis:** Neural autoencoders as support of cluster analysis of graphic data

Polish-Japanese Academy of Information Technology, BS in Computer Science

Sep 2016 – Jun 2020

- **Specialization:** Robotics
- **Thesis:** Educational robotic platform
