

Grzegorz Gołębiowski

Tech Lead, Senior Java Developer, 6+ YoE

Warsaw, Poland | grzegorz.golebiowski127@gmail.com | linkedin.com/in/grzegorz-golebiowski | github.com/gregg127

Summary

Software Engineer with a Master's degree in Computer Science and hands-on experience in Java-based tech stack. Led a team of 10+ members in building software for the banking sector. Experienced in guiding the transformation of a system from monolithic architecture to microservices, while continuously delivering new features and developing solutions to address challenges related to latency, throughput and scalability. Collaborated closely with clients and across multiple teams to deliver solutions.

Key skills

Areas of expertise: content management systems, custom software development, requirements analysis, project estimation, system design and architecture, backend development

Programming languages: Java, Clojure, SQL, Python, JavaScript, Typescript

Technologies: Spring, Spring Boot, Jakarta EE, WildFly, JBoss EAP, Hazelcast, PostgreSQL, jOOQ, Flyway, Varnish Cache, Consul, Apache Kafka, Apache Zookeeper, Solr, Quartz, Swagger, React JS, Gatsby SSG

Architecture: Microservices, C4 model, onion architecture, anemic and rich domain models, caching

DevOps: Docker, Kubernetes, k3s, OKD, Openshift, Kustomize, Helm, GitOps, Jenkins, Grafana, Sonatype Nexus Repository

AI: GitHub Copilot CLI, Spec-Driven Development, GitHub Spec Kit

Tools: Linux, macOS, Jira, Neovim, IntelliJ IDEA, Git, Gradle, SonarQube, OWASP Dependency-Check

Leadership: Blake and Mouton Managerial Grid Model, Blanchard Situational Leadership Model, Start-Stop-Continue feedback

Languages: Polish (native), English (C1)

Experience

Tech Lead, Senior Java Developer, e-point SA

Jan 2023 – Sep 2025

- Led development of a CMS web platform with 15+ deployed services, serving traffic for millions of users for one of the leading banks in Poland
- Delivered features across multiple projects in both time-and-material and fixed-price contracts, working across Waterfall and Agile methodologies
- Redesigned release and deployment processes, reducing error rate and developer's manual effort
- Drove continued decomposition of monolithic architecture into a modular monolith, with a long-term goal of microservices migration
- Coordinated cross-team collaboration and acted as technical point of contact for clients
- Led major version migrations of PostgreSQL 9.6 to 16, OKD 3 to 4 and Java 8 to 11 across multiple applications
- Maintained and enhanced a throttling mechanism using Apache Kafka as a message broker
- Analysed DDoS incidents, investigated logs, implemented traffic protection measures and fixed corresponding bugs

Senior Java Developer, e-point SA

May 2022 – Dec 2022

- Implemented new features and contributed to decomposition of monolithic architecture into more modular components
- Diagnosed and resolved JVM memory leaks; performed JVM, cache and database query tuning and resolved performance bottlenecks in application code
- Designed SSE-based communication with frontend for parallel session handling and session count control
- Planned and executed load and performance tests using Gatling
- Configured and maintained Kubernetes environments in OKD
- Coordinated application releases and production deployments in collaboration with a client

Java Developer, e-point SA

Sep 2020 – Apr 2022

- Remediated security vulnerabilities identified in external audits and tuned circuit breaker and rate limiting mechanisms
- Implemented new features and contributed to client requirements analysis and refinement within an Agile team
- Contributed to architecture design, technology selection and solution evaluation
- Maintained and improved Jenkins pipelines
- Improved system observability with Grafana dashboards and alerts
- Developed and maintained automated UI test suites using Selenium

Junior Java Developer, e-point SA

Aug 2019 – Aug 2020

- Developed and maintained the e-point CMS platform for the banking and insurance sector
- Implemented new CMS modules and components tailored to client requirements

Education

Polish-Japanese Academy of Information Technology, MS in Computer Science	Sep 2020 – Jul 2023
• Specialization: Mobile device network and cloud computing technologies • Thesis: Neural autoencoders as support of cluster analysis of graphic data	
Polish-Japanese Academy of Information Technology, BS in Computer Science	Sep 2016 – Jun 2020
• Specialization: Robotics • Thesis: Educational robotic platform
